Best For	Everyday Users	Everyday Users	Everyday Users	Advanced User	GIS Users	GIS Users
Product Description	eBook is a digital county plat map (.pdf) identical to the printed plat book with the exact same maps, content, and data, like facing-page aerials.***	MobilePlat is a seamless, geo-referenced county plat map (.pdf) that is designed for use on mobile devices (Avenza PDF Maps) and now your desktop (Adobe Acrobat Reader).	Image Files are non-georeferenced county map images (.tif) that easily import into most desktop graphics programs and mapping applications allowing you to make quick and easy changes.	RMP SmartImage is a seamless, georeferenced county map image (.tif) that you can import into GIS software to layer with other datasets such as aerials, soil maps or watershed boundaries	Vector File is a multi-layered, georeferenced dataset (.dwg or .dxf) that you can import into GIS or CAD software for a seamless countywide view of large tract owners, parcel boundaries, acreage information and related geographic features.	Our fully attributed parcel polygon data contains** PINS, ownership information, addresses and other related attributes. All data is standardized in an easy-to-use structure.

* License is valid for one year from purchase date. eBook and MobilePlat come bundled with a Lifetime Site License.

** Availability of feature depends on the county, see the [Parcel Shapefile Data Availability List](#) to see which features are available by county for Parcel Shapefile Data.

*** Most books published after 2000 have facing-page aerials. Please contact us if you are interested in aerial maps for a specific book.
